KNOW YOUR BAG

TUBULAR BAGS

The Tubular Bag includes many variants with Top and Bottom attachment options. Designed to carry load ranging from 500 to 2000 kgs, with Safety Factor of 5:1/ 6:1, such bags offer better storage and transportation against the traditional woven sacks

BAFFLE BAGS

The Q bag design is constructed by sewing polypropylene baffles across the four corners of the FIBC bag. Thus, when the bag is filled, the baffles prevent the sides from bulging out or falling over when being stored or transported, giving the bags a straight shape.

U PANEL BAGS

The Standard Bag includes Builder Bags, Tunnel Lift Bags, Corner Loop bags with various Top and Bottom attachment options. Designed to carry load ranging from 500 to 2000 kgs, with Safety Factor of 5:1/ 6:1.

4 PANEL BAGS

The Standard Bag includes Builder Bags, Tunnel Lift Bags, Corner Loop bags with various Top and Bottom attachment options. Designed to carry load ranging from 500 to 2000 kgs, with Safety Factor of 5:1/ 6:1.
